

## AT-A-GLANCE

See below for a summary of Swift features released.

### Shipping | Monthly Nominations

-  • Clone (copy & paste) capability of previously accepted monthly nominations

### Loading | Customer Authorizations

-  • User no longer gets the lightbulb error page after making a selection of turning on/off within Authorizations screens. User can navigate to other Swift screens.
-  • Remaining volume now visible at the rack in a product-specific Customer Authorization setup.
  - When a user creates a new, product-specific customer authorization in Swift, the remaining volume is now visible in Swift and at the rack for the driver. The remaining volume amount reflects the same across all systems.

### Global | Destinations

-  • Additional Search Fields within Global > Destinations
  - Three fields have been added for enhanced search fields: Location Name, Location ID and Location Destination ID, making a total of six filter options available.
