

Why are we making this change?

We have been made aware of instances where transport trucks are blocking the rail crossing at the intersection of Smith and Chambers Roads near Magellan's Aurora terminal. We ask for your cooperation in working through this period of increased traffic by ensuring that your safety and the safety of the general public is at the forefront of your mind.

Please do not block the rail lines as it puts yourself, commuters and other traffic at a severe risk.

We feel that this alternate route best provides access to the facility while working to improve traffic flow and reducing risk to our customers and the general public.

Thank you for your business.

Thank you for your cooperation and business

We sincerely appreciate your business and completely understand the frustrations you may be experiencing due to long wait times at the terminal. Magellan has experienced an increase in truck traffic due to the recent supply constraints in the Denver metroplex.
