## Q4 2023 Features Release

See below for high-level summaries of multiple Swift feature functionalities deployed.

At-A-Glance

1. General Swift

    • Swift Logo re-directs you to the Swift homepage

    • Three new shortcut buttons added

2. Inventory Features

    • Additional filter option added to reporting

    • Offline locations added to the reconsignment workflow

3. Loading Features

    • My Authorizations tile is now a separate workflow tile

    • FEIN number added to the carrier company name

    • Terminal information map

4. Shipping Features

    • Additional fields displayed
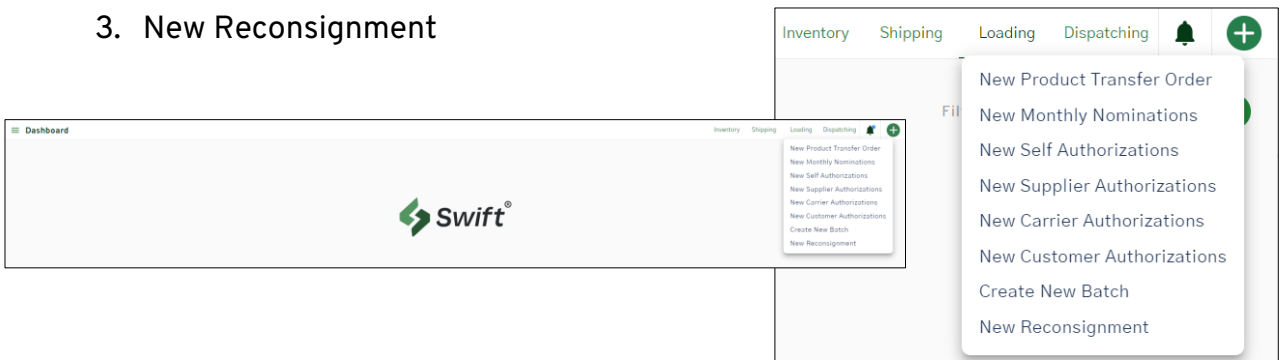

GENERAL

SWIFT

1. Clickable Swift logo: Re-direct back to Swift Homepage

   - Anywhere within Swift, the user will be directed to the home tile screen whenever the Swift logo is clicked.

2. Three New Shortcut features added to the (+) Call-to-Action Process in upper-right hand button.
   1. New Monthly Nomination
   2. Create New Batch
   3. New Reconsignment

Customer-Requested Enhancement
You asked, and we listened and released.
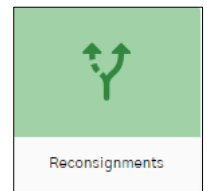

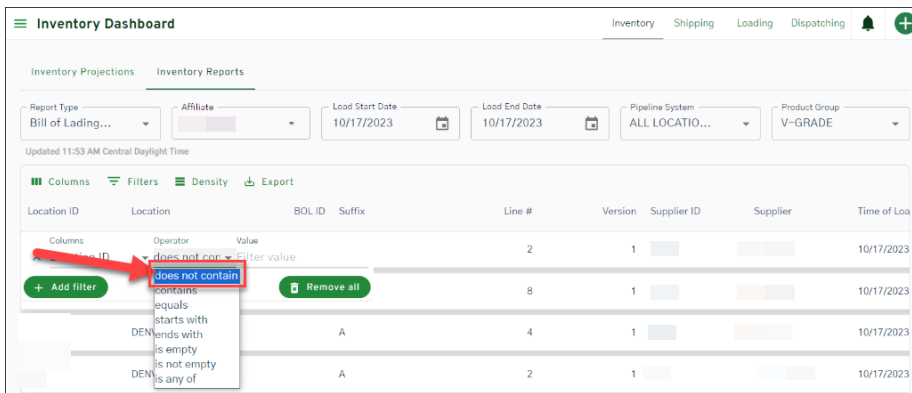

2023 Confidential

INVENTORY

INVENTORY REPORTS

(Inventory Tile > Inventory Dashboard > Inventory Reporting tab)

1. The "Does not contain" filter option is now available.

- When the inventory filter results are generated, the user will see a "does not contain" additional filter option.

RECONSIGNMENTS

(Inventory Tile > Reconsignments)

1. Offline Locations Added

- Missing offline locations were added; they are now available to select to move forward in the reconsignment process.

2. Progress bar/step counter for Reconsignments now displayed

- User can now see what step (of three) they're at for creating a new reconsignment process.
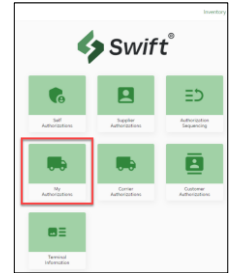

LOADING

MY AUTHORIZATION TILE

(Loading tile > My Authorizations)

1. Swift has created a My Authorization tile with the Loading features.

    - There is now a separate, independent My Authorizations tile for easier and quicker access to this feature.

CARRIER AUTHORIZATIONS

(Loading tile > Carrier Authorizations > New Carrier Authorization process)

1. FEIN Number added to the front of the carrier company name

    - The carrier company's FEIN number is now visible within the carrier company's name in the carrier dropdown selection.

TERMINAL INFORMATION

(Loading tile > Terminal Information tile > Inventory Reporting tab)

1. The Terminal Information sub-model screen correctly links the user directly to the terminal information map.

SHIPPING

BATCHES

1. Additional Details Added to Overview Results Screen

    - All applicable fields are now displayed on the Swift Batches overview screen for batches and shipments.

        - For example, the Access Code and Agreement Code.

    - Additionally, these fields are visible in the Export to Excel feature and are synced accordingly.

As a reminder, Batches combines two legacy ATLAS processes - Origin Release (OR) & Shipment Request (SR) - into one process.
